- *Rocketlife Engine* features layers of graphics, photos, text
- Smart Arrangement Technology automatically groups related photos together
- Best of Breed Theme Effects, automatic background photo tint, blur, lighting & textures
- Aspect & Resolution independent layout engine automatically fits your creation to any product
- Real-time Rocketlife Engine product preview always shows exactly how your creation will look

Have fun creating great gifts with your digital photos!
And Support RACH Fund!

Try it out today & see for yourself!

Instantly start playing with your photos – no upload, no email address, no login required. RocketLife is so fast, it truly is "Easy as 1,2,3".

- 1 Visit www.abbyphotostore.com/rach-fund and click the Launch button to get the RocketLife
- 2 Click "Start a New Project" and choose your favorite photos
- 3 In seconds you have already created spectacular products with your photos!

Then just pick something from the catalogue, and presto ~ your photos appear on your own amazing creations, ready to order!

What one customer said, "I have been creating photo-books for over two years using various online companies. I was recently referred to your website by a friend. I was impressed. The software is easy to use and very powerful. I can do things on your site that no other site can offer! The editing tools are incredible not to mention the choice of sizes, binding and cover materials. The colour reproduction was superior and they were the first books I have ever gotten that were sewn (library like quality). I played with the photo mugs and other products and this is definitely not drag and drop. Can't wait to place my next order. Many thanks!"

Sheelagh Greek, Moncton, NB

Unique Real-Time 3D Digital Merchandising

You can actually see your images move around the product...like magic!

Smart Arrangement Technology

We'll lay it all out for you...you'll wonder how we did it!
